

Cyber-Risk Management

The Institute of Risk Management defines cyber-risk as “any risk of financial loss, disruption or damage to the reputation of an organization from some sort of failure of its IT systems”.

As more and more small businesses conduct advertising, customer support, and transaction online, the risk of breach and compromise multiplies.

At the same time, the cost of staging cyber-attacks and advanced persistent threats continues to go down, making it ever easier for cyber criminals to target a wider set of victims. The most common cyber-attacks on small businesses include web site impersonation and spoofing, user credential, credit card numbers and personal identity numbers theft.

The NETGEAR Dark Web Intelligence is a web based service, delivered and managed by NETGEAR partnered Managed Service Providers (MSPs) and Managed Security Service Providers (MSSPs) to small businesses who are looking for a cost effective cyber-risk management strategy and solution.

Highlights

Domain Protection

- Discovers fraudulent domains that impersonate the legitimate web sites of a business in order to conduct advanced phishing campaigns, spreading malware and capturing visitor information which can later be used for malicious purposes.
- Early warning to prevent data loss, and damage to business reputation, credibility and operations.

Credit Card Number Theft Alert

- Discovers credit card number theft before a fraudulent transaction takes place.
- Early warning before a transaction attempt, preventing costly transaction review and fund recovery.

Email Credential Theft Alert

- Identifies leaked, stolen and sold user credentials in real-time on the open, deep and dark web, along with information about relevant malware used to steal it.
- Early warning to prevent infiltration of own web site, as well as masqueraded fraudulent and criminal activities on the Internet.

Personal Identification Number Theft Alert

- Identifies leaked, stolen and sold personal identification numbers, such as social security numbers and national identification numbers
- Early warning to prevent criminal use of personal identification numbers.
